Lunch ON THE FRONTIER

With Dr. Tim Ball, Historical Climatologist

Why There's Nothing New About Climate Change

(Except "over the top" politics)

Date & Time:
Friday, Jan. 26, 2007,
11:45 a.m.

Place:
Pan Am Room
Winnipeg Convention Centre
375 York Ave. Winnipeg

Price: (inc. GST)
$ 40 for a Reserved Seat (1)
$320 for a Reserved Table (8)

How to Register:

ON-LINE: www.fcpp.org

E-MAIL: rempels@fcpp.org

PHONE: 977-5050

FAX this form to: 957-1570

MAIL this form to:
Frontier Centre for Public Policy
Suite 25, Lombard Concourse
One Lombard Place
Winnipeg, MB R3B 0X3

Science advances by creating theories based on assumptions, and scientists are skeptics who test the theory by seeking evidence. In the case of global warming, the theory became "fact" before any testing occurred, primarily because it fit environmental and political agendas. As Dr Richard Lindzen of MIT says, "The consensus was reached before the research had even begun." Scientists who dare to challenge this are marginalized and labelled as "deniers." Despite that, research is consistently showing that conventional assumptions are wrong and that neither CO^2 nor humans cause climate change.

Global warming and climate change are among the most serious misdirectionsof science for political purposes in human history. Large segments of society are being bullied into tacit acceptance of the Kyoto Accords or into silence by a very vocal minority. Do we have pollution problems? Yes, but CO^2 is not a pollutant and claims that it is distract us from setting proper priorities. Only if we calm environmental hysteria can we come up with workable, sustainable policies to achieve clean air and water.

Professor Ball's 2004 Global Warming Frontier lecture was an entertaining and informative hit. Join us for an update on the world's most politicized policy file. Seating is limited and the price includes lunch.

Please reserve your seat now.

Tim Ball has an extensive scientific background in climatology, especially the reconstruction of past climates and the impact of climate change on human history. He is Chair of the National Resources Stewardship Project, a non-profit project that promotes responsible environmental stewardship. He is also a regular contributing writer for *Country Guide* magazine and a researcher/author of numerous papers on climate, long-range weather patterns, the impacts of climate change on sustainable agriculture, ecosystems, historical climatology, air quality, untapped energy resources, silting and flooding. He had a long academic career at the University of Winnipeg until he moved to Victoria in 1996. He has a BA from the University of Winnipeg, an MA from the University of Manitoba and a PH.D (Doctor of Science) from the University of London, England.
